

EnsoData AI Powered PAP Therapy Adherence Prediction within React Health Connect

- ✦ Equip DME staff to prioritize and give personalized support to patients
- ✦ Reduce time spent on patients who will reach 90-day compliance without help
- ✦ Increase coach-to-patient ratios and ability to manage more patients
- ✦ Improve compliance by focusing on patients needing support

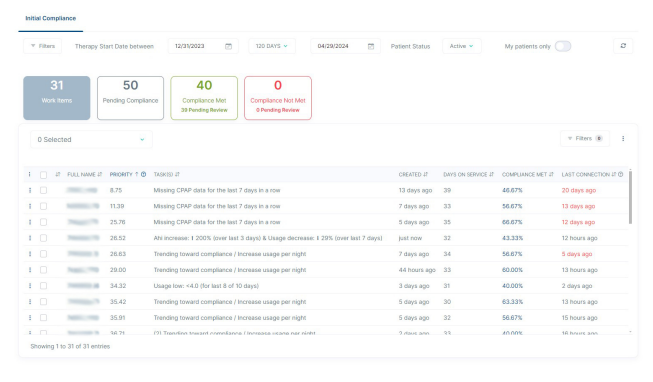

Patient Pop-Up Screen

Displays the patient's data in the first 90 days of their compliance journey.

Work Items

Generated by EnsoData AI allow you to manage your patient's by exception

Focusing your time in the patients who need your help the most.

Priority Score

EnsoData AI provides a priority score to all patients in their first 90 days of compliance

The closer to priority score is to zero, the less likely the patient is to achieve adherence without an outreach.
